

COMPUDON Junior (Season VII)

By Grade 3, children are already navigating YouTube recommendations, multiplayer games, messaging apps, and AI-powered tools, often without guidance on what is safe, real, or trustworthy.

COMPUDON Junior for Grades 3–5 prepares them for this reality. Students learn to recognize online risks, such as strangers asking personal questions, misleading links, unsafe game permissions, and false or manipulative content.

They practice protecting personal information, understand why their digital identity matters, and develop the habit of questioning what they see online: Why was this posted? Who benefits from me believing it? What would I find if I checked? These are essential life skills, not just learning skills.

At this age, children are already forming opinions based on what apps and websites choose to show them. Media literacy helps them understand that images, videos, headlines, and even AI-generated responses can be misleading or incorrect. They learn what AI is, why it can make mistakes, and why digital information must always be checked critically.

COMPUDON Junior Grades 3–5 does not test what children already know. It teaches them what they urgently need to know, before the internet teaches them the hard way.

Framework Inspirations

- ❑ UNESCO Media and Information Literacy Framework*
- ❑ UNICEF Child Online Protection Guidance*
- ❑ OECD Learning Compass and related learning recommendations*
- ❑ Microsoft AI and cybersecurity learning pathways*.

Exam Objectives

Digital Safety and Online Protection

I. Staying Safe During Online Interactions

- Recognize and respond to online harassment
- Recognize and avoid unsafe online behavior
- Recognize pressure tactics and tricks used by strangers online
- Identify and report content that makes children uncomfortable or unsafe

II. Protecting Personal Information Online

- Understand what a digital footprint is and how it is created
- Manage and protect their digital footprint
- Make careful decisions about what personal information to share online and with whom

*Referenced organizations and companies have not reviewed, endorsed, or certified this program.

Exam Objectives (Season VII)- Grades III to V

Critical Thinking & Creativity

III. Thinking Critically and Asking Better Questions

- Analyze evidence and facts to reach logical conclusions
- Question assumptions before accepting information or taking action
- Choose the right digital tool or format to share an idea clearly, a picture, a list, a video, or a diagram
- Apply creative thinking when using technology to solve problems

IV. Growing as a Problem-Solver and Learner

- Organize ideas clearly using digital tools
- Try different approaches to solve problems and improve
- Reflect on which strategies work best for their own learning

V. Spotting False and Misleading Content

- Identify when images, videos, and headlines online may be false or misleading
- Recognize clickbait, exaggerated headlines, and content designed to trick or surprise
- Practice simple techniques to check whether online content is likely to be true

VI. Thinking Before Believing or Sharing

- Ask questions before accepting online content — who posted this, and why?
- Recognize when online content is designed to influence how they feel or what they believe
- Understand that apps and websites choose what to show based on what gets attention — not necessarily what is true or helpful

Media Literacy and Online Information

AI Awareness and Responsible Technology Use

VII. Understanding AI and How It Works

- Identify what AI is and explore the different kinds of AI tools encountered daily
- Understand what AI can and cannot do
- Recognize how AI uses information to give answers and why good information leads to better results
- Explore how wrong or unclear information can lead to incorrect answers

VIII. Using AI Tools Safely and Wisely

- Use simple AI tools safely and ask better questions
- Check whether AI answers make sense before accepting them
- Understand that AI answers may not always be correct
- Use AI to support learning without copying or cheating
- Respect others and behave responsibly while using technology
